// ABOUT

Nigerian-born fullstack developer who ships fast and thinks in systems. I build at the intersection of modern web, Web3 protocols, and AI tooling — from RWA tokenization platforms to DeFi terminals and AI execution layers. I don't just write code; I build products people actually use, with a sharp eye for UX and an obsession with clean architecture. Born in Lagos, building for the world.

// SELECTED PROJECTS

AssetDot — assetdot.vercel.app

RWA tokenization platform on Portaldot. Tokenize Lagos real estate & African farmland — trade and bridge across chains with ZKP privacy.

Next.js

ink!

ZKP

Polkadot

Web3

Arc Terminal — arcterminal.vercel.app

Full-featured DeFi trading terminal. Send USDC, swap EURC, bridge chains, manage payroll and storefronts — all in one place on Arc Testnet.

Next.js

Arc SDK

USDC

DeFi

ORO — orobest.vercel.app

AI-powered execution layer for capital. 99.6% accuracy, sub-200ms response, 86,400 daily scans. Strategy runs 24/7 — zero emotion.

Next.js

AI

DeFi

zTLS

TEEs

ArcBounty — arcbounty.vercel.app

Onchain developer bounty board. Post tasks, claim work, get paid in real USDC via Arc SDK with sub-second settlement. No middleman.

Next.js

Arc SDK

Supabase

USDC

OsogboRent — osogborent.com

Osogbo's most trusted property platform. Verified listings of houses, shops and apartments for rent or sale across Nigeria's Osun State.

Next.js

Supabase

Real Estate

// APPROACH

- ◆ Ship fast, iterate faster — I bias toward working products over perfect plans.
- ◆ Full ownership: design, code, deploy, monitor. No handoffs, no excuses.
- ◆ Web3-native mindset: onchain-first architecture, composable by default.
- ◆ AI-augmented workflow: use LLMs as a force multiplier, not a crutch.
